

## NOTABLES OF WILLIAM COUNTY 2006 EDITION

Clymer Facial Plastic Surgery is committed to providing the highest quality, state-of-the-art cosmetic surgical and medical care in a comfortable and confidential environment. Dr. Mark A. Clymer specializes in cosmetic and reconstructive surgery of the face, nose, eyelids, head and neck. When he first sits down with a new patient, Dr. Clymer begins by asking questions about the patient's expectations and then explains various options to consider. "Often, patients come to me and ask about certain procedures they have seen on television talk shows," he says. "We discuss the procedure, and if I feel the patient is not a good candidate, we explore other options."

Dr. Clymer views facial cosmetic surgery as the intersection of artistic creative vision with scientific methods. "There is an art to both visualizing the result of a procedure and in communicating that intended result to the patient," he says. "The science involves the technical aspects of each procedure or operation, as well as the precise implementation of that science. If facial plastic surgery were solely art, the ability to reproduce successful results for each patient would be limited."

Dr. Clymer's focused specialization has given him a substantial body of knowledge and extensive experience in all forms of facial plastic surgery and rejuvenation.

This experience has been obtained over many years of training. Dr. Clymer received both his undergraduate degree and his doctor of medicine degree from the University of Iowa. He completed his postgraduate training at Vanderbilt University Medical Center. This included two years of general surgery followed by four years of specialty training in otolaryngology-head and neck surgery. During this time, Dr. Clymer was involved in complex reconstructive surgeries of the face, head and neck area. This served as the foundation upon which he would develop his interest and skill in facial plastic surgery. To further his training, Dr. Clymer completed a fellowship in facial plastic and reconstructive surgery in Rochester, New York. His solo practice in Brentwood is devoted entirely to plastic surgery of the face, head and neck. Dr. Clymer is board certified by the American Board of Facial Plastic and Reconstructive Surgery and the American Board of Otolaryngology. A recipient of numerous honors and awards, Dr. Clymer is a published author and popular public speaker. His talent, artistic vision, attention to his patients and his committed, caring staff result in his practice continuing to be one of the most successful in the region.
